PROFILE

As an aspiring software developer, I love the challenges the tech industry provides. My years of dealing with customers in the banking industry has honed my ability to balance user-centricity with compliance. This allows me to see the bigger picture, outside of the codes, to give the best possible experience to end-users.

EXPERIENCES

**2022   Software Engineer Analyst
Lexly Health Singapore**

- Part of the backend web developer team to develop, enhance and maintain features using **C# .NET 5.0** within project timeline. Collaborate with frontend developers for code integration. Test and fix bugs.
